## MAIN FEATURES

#### Account ledger:

Provides default ledgers and groups. Users can also create their own ledgers. These ledgers can be created separately one by one, or grouped under a common category.

#### Payment / receipt voucher:

Handles all cheques, cash payments and receipts of the company. Payments and receipts can be done directly or against a bill. Multiple payments/receipts can be done in a single voucher.

#### Journal voucher:

Adds miscellaneous accounts. The gap between actual and expected ledger balance can be adjusted.

#### PDC payable /Receivable:

Handles cheques given or received post date. Clearance of PDC will be done with PDC Clearance.

#### PDC clearance:

Clears cheques paid/received post date. The cheques may be cleared or bounced. The subsequent changes will be done by the system accordingly.

#### Contra voucher:

Handles all bank deposits and withdrawals.

#### Purchase / Sales:

Handles purchase and sales modules of accounting very easily. Purchase can be done against order, material receipt or directly. Sales can also be done against order or directly against the delivery note. Changes to stock and accounts will be done automatically.

#### Purchase / sales return:

Handles returning of damaged items. Items may be returned against an invoice, or directly.

#### Payroll:

The comprehensive payroll management system allows you to create different payheads, add designations and employees under each designation, handle attendance records, set bonus/deductions for employees, generate salary for each month and generate pay slips.

#### Reports:

Powerful report generation facility allows users to choose fields in reports. All kinds of financial reports like profit and loss, balance sheet, etc available. Reports for salesman/area/market/fast-moving and slow-moving good can also be generated. Navigation to lower levels till vouchers possible. Reports can also be exported to MS excel, Word, HTML, etc

Account Suit is available in three versions. You can choose the one best suited for your business and get it customized from us:

**Single User:** Suitable for small businesses where all accounting and monetary transactions are done in just one system. Account Suit can be installed in that system, and a single user holds all the privileges to the software and the data stored in it.

**Multi user:** Suitable for businesses like supermarkets, huge shops, etc where transactions and accounting are done in numerous systems, but all of them are connected via LAN. Account Suit can be installed in a master system and as many other systems with user privileges given as required, and accounting activities can thus be synchronized.

**Web-based:** This version is for businesses that have numerous branches and offices in various locations. Account Suit can be installed in a master system and as many user systems as you want to, with privileges and access controls set as you desire. Accounting activities are co-ordinated via web securely, and data can be accessed safely no matter where you are.
